ABOUT ME

I am a computer science student at the University of Gdańsk. I am a responsible and well-organized person who can work independently and in a team. I have experience working with clients and in tasks requiring accuracy. I am currently developing my skills in C# programming. I try to approach work with a positive attitude and care for a good atmosphere around me.

EDUCATION

University of Gdańsk, Faculty of Mathematics, Physics and Informatics
Computer Science (part-time), 2024 – 2027

PROFESSIONAL EXPERIENCE

Giax

Internship - IT Support Specialist

Olsztyn

05.2024 - 09.2024

- Provided Helpdesk support for business clients in resolving technical issues related to ERP systems and dedicated applications.
- Diagnosed reported errors and problems, and supervised the process of their resolution to ensure continuity of users' work.
- Communicated with users, gathering requirements, and collaborated with the development team to fix reported bugs and implement potential improvements.

PROJECTS

Invoice AI Processor API | <https://github.com/fstaszekiewicz/smf-young-tech-challenge>

Technologies used: **PHP / Laravel, Swagger, Docker, SQLite, Hugging Face API, Tesseract OCR**

- Designed and implemented a REST API allowing the upload of invoices (PDF, JPG, PNG) and data extraction from them using asynchronous background tasks.
- Containerized the application using Docker, automating the installation of required dependencies.
- Integrated local text recognition mechanisms and an external Artificial Intelligence API for intelligent mapping and correction of structured data from financial documents.
- Secured the system with tokens and generated full Swagger documentation, facilitating endpoint testing.

Cinema Reservation API | <https://github.com/fstaszekiewicz/CinemaReservationApi>

Technologies used: **C# / ASP.NET Core, React, HTML, CSS, GitHub Actions, Azure**

- Created a REST API to handle movie screenings, seats, ticket types, and reservations. The front-end fetches and saves data via API endpoints.
- Built the front-end in React with a repertoire view for the upcoming week and a seat selection option.
- Configured CI/CD in GitHub Actions: front-end build and automatic deployment to Azure Storage and back-end build and deployment to Azure Web App.

Miare.pl - e-commerce website | <https://miare.pl>

Technologies used: **PHP, HTML, CSS, JS, Wordpress**

- Managed the full project lifecycle, from initial consultations and requirements gathering to the successful design, creation, and deployment of the platform.
- The deployment included full SEO, performance optimization using a CDN, and Google Analytics integration for statistical analysis.
- Designed a seamless order fulfillment process, integrating the secure Autopay payment gateway and domestic courier services, utilizing an automated notification system.

SKILLS

Languages: English (C1), Polish (Native)

Technical skills: C# (.NET), Python (Django), PHP (Laravel), SQL, HTML, CSS, JS
